Third Annual

Selected Topics in Craniofacial Surgery:

*An International Symposium on Cranioplasty
and Implantable Neurotechnology*

Presented by

*Department of Plastic and Reconstructive Surgery &
Department of Neurosurgery*

November 4 - 5, 2017

General Session - November 4

Shriners Auditorium
Shriners Hospitals for Children
Boston, MA

Hands-On Lab - November 5

Location TBD

JOHNS HOPKINS
MEDICINE

Activity Directors

Chad Gordon, DO, FACS

Assistant Professor of Plastic Surgery
and Neurosurgery
Johns Hopkins University School of Medicine
The Johns Hopkins Hospital

Judy Huang, MD

Professor of Neurosurgery
Johns Hopkins University School of Medicine
The Johns Hopkins Hospital

William T. Curry, M.D.

Associate Professor of Surgery
Harvard Medical School
Massachusetts General Hospital

Michael Yaremchuk, MD

Professor of Surgery
Harvard Medical School
Massachusetts General Hospital

Description

Modern-day cranioplasty is undergoing a significant paradigm shift related to various techniques, surgical advancements, implantable neurotechnology, and improved biomaterials. These changes have stimulated us to assemble premier thought leaders in various specialties including craniofacial plastic surgery and neurosurgery to meet for the third annual symposium dedicated to the subject of “cranioplasty”—to be hosted this year at Harvard Medical School in Boston, MA. The faculty will gather to present evidence-based data on surgical approaches and state-of-the-art materials, engage and network within a broad array of colleagues and experts, and share high-yield experiences to help attendees improve their patient outcomes. Interactive panel discussions following each lecture will offer the opportunity to debate the evidence, exchange ideas, and gain invaluable insight to assist with the most challenging cases. This year’s symposium will engage an international faculty and audience consisting of craniofacial surgery, neurosurgery, plastic/reconstructive surgery, oral/maxillofacial surgery, and otolaryngology/head and neck surgery to explore and elucidate the new insights and advances relative to cranioplasty.

Target Audience

This activity is intended for residents, fellows and physicians in Neurosurgery, Craniofacial Surgery, Plastic and Reconstructive Surgery, Otolaryngology—Head and Neck Surgery, Oral Maxillofacial Surgery and Oculoplastic Surgery.
